PREMESSA

I lavoro di ricerca sviluppato sui testi amministrativi neo-sumerici del British Museum, pubblicati in questo volume, è stato possibile grazie al finanziamento del *Ministerio de Educación y Ciencia* della Spagna. Il progetto destinatario dei fondi, di cui sono stato ricercatore responsabile, ha avuto come titolo *Edición y estudio de tablillas cuneiformes sumerias del "British Museum" (Londres)*, essendo il numero di referenza *PB94-1156*.

Desidero esprimere i miei più vivi ringraziamenti ai *Trustees of the British Museum* per accordare il permesso di pubblicazione di queste tavolette. Sono anche molto grato a tutto lo *staff* del *Department of the Ancient Near East* del museo, e in particolare al Dr. C.B.F. Walker, per il loro aiuto e gentile collaborazione durante le mie visite alla *Students Room* del Dipartimento.

La versione italiana del manoscritto è stata rivista e corretta, con grande pazienza e accuratezza, dalla Dr.ssa. M. Elena Milone (Università di Messina), a chi ringrazio di cuore la sua generosità. La edizione dei testi si è vista anche arricchita da stimolanti discussioni su alcuni aspetti tenute con Marcos Such-Gutiérrez (CSIC, Madrid).

La mia sincera riconoscenza, infine, è per Giovanni Pettinato, chi di nuovo ha accolto il risultato del mio lavoro nella serie che lui dirige *Materiali per il Vocabolario Neosumerico*.

La traslitterazione dei numerali segue le solite convenzioni negli studi di Ur III. Si deve avvertire che:

- Ai numerali curviformi si aggiunge *c*.
- Ai numerali obliqui si aggiunge *o*.
- Quando i *gur* si scrivono con cunei verticali anzi che orizzontali, si aggiunge (I).
- Al sistema di numerazione concernente alla categoria dei lavoratori si antepone °.
- Quando nel testo si scrivono le unità con cunei orizzontali lì dove non è abituale, i segni vengono traslitterati come AŠ, 2xAŠ, 3xAŠ, ecc.

INTRODUZIONE

La edizione dei testi inediti neo-sumerici compresi nella sezione BM 13601-14300 del British Museum mi fu affidata da Giovanni Pettinato, alcuni anni fa, come parte di un progetto¹ che intendeva la pubblicazione in traslitterazione di tutti i testi catalogati da H.H. Figulla in *CBT 1*.

Seguendo, allora, il magnifico lavoro di catalogazione fatto da lui, e quindi la sua attribuzione dei testi alla Terza Dinastia di Ur, ho preparato la edizione delle 292 tavolette che, nella suddetta sezione, rimanevano ancora senza pubblicare. Si è rifatta la edizione dei testi solo in quattro casi:

- a) NN. 95 (BM 13762) e 160 (BM 13858), pubblicati da P. Mander secondo informazioni che io stesso gli avevo fornito per la sua ricerca².
- b) NN. 25 (BM 13661) e 144 (BM 13837), traslitterati da A. Uchitel in un lavoro inedito³.

Da un'altra parte, sono rimasti fuori di questo volume:

- a) Tavolette o frammenti troppo distrutti per traslitterare: BM 13605, 13671, 13867, 13917, 14051++, 14053, 14055, 14056, 14076, 14103, 14107, 14110, 14130, 14141, 14151, 14167, 14261, 14262, 14263.
- b) Tavolette che, per diversi motivi, non si trovavano disponibili per il lavoro di ricerca: BM 13602, 14240, 14248, 14267.
- c) Tavolette erroneamente attribuite da H.H. Figulla alla Terza Dinastia di Ur, e che in realtà sono di epoca paleo-babilonese: BM 13907, 13924, 13940, 13943, 14035, 14040, 14098, 14108, 14152.

L'ordine di edizione segue il numero di museo. Alle traslitterazioni, indici e commenti si sono aggiunte le copie di ventotto tavolette. Si tratta, nella maggior parte dei casi, di testi di varie colonne che si conservano solo in modo frammentario e che, magari grazie alla copia, potranno un giorno essere integrati con altri frammenti.

Provenienza dei testi

I testi compresi fra i numeri di museo BM 13601 e BM 14300 furono acquistati dal British Museum come parte di tre collezioni diverse⁴:

- a) NN. 1-13 (BM 13601-13634): J.H. Binney, Baghdad (collezione 96-3-26).
- b) NN. 14-174 (BM 13646-13900): Messrs. F. Huth & Co (collezione 96-3-31).

² P. Mander, "A Minor Archive of Ur III Lagash for the Provisions of the Governor", *Aula Orientalis* 16 (1998) p. 212 T33, p. 224 T50.

³ A. Uchitel, *Mycenaean and Near Eastern Economic Archives*, University College London 1985, NN. 8 e 2 (si veda <http://www.leidenuniv.nl/~jagersma/sta/ur3/uchitel.txt>).

⁴ M. Sigrist – H.H. Figulla – C.B.F. Walker, *Catalogue of the Babylonian Tablets in the British Museum*, II, London 1996, p. X.

- c) NN. 175-292 (BM 13906-14300): C. Pinches (Londra), agente per Mr Faraye di Baghdad (collezione 96-4-2).

La grande maggioranza dei testi di Ur III catalogati in *CBT 1* e *CBT 2*, e di conseguenza quelli qui pubblicati, provengono da Girsu. Questa provenienza si è potuta verificare in quasi tutti i casi con l'aiuto della *Base de Datos de Textos Neo-Sumerios* che stiamo sviluppando a Madrid. I criteri usati per attribuire una città di origine a una tavoletta sono stati i soliti (sigilli, toponimi, prosopografia, nomi dei mesi...), ma aggiungendo adesso la certezza di una utilizzazione esclusiva in una città di determinate espressioni, oppure la ricorrenza in un solo luogo di alcuni antroponimi, teonimi, toponimi, ecc. Sono rimaste così poche tavolette di cui non mi è stato possibile precisare la provenienza, sebbene è probabile che anche in questi casi fosse Girsu il luogo di origine.

I “testi dei pastori”

Oltre alla classifica contenutistica fatta più giù, c'è da avvertire la presenza in questa edizione di alcuni interessanti gruppi di tavolette. Uno di essi è costituito da documenti che registrano le consegne a pastori di cibo per gli animali⁵. Questo tipo di testi è stato studiato da J.-M. Durand e D. Charpin in un'eccellente lavoro⁶, che fu poi ripreso da K. Maekawa⁷. Lo studio di Durand e Charpin non forniva però la edizione, nè la citazione dei documenti del British Museum su cui si erano basati per trarre le loro conclusioni. La pubblicazione di una importante quantità di queste tavolette nel presente volume ci permette adesso di stabilire una tipologia provvisoria, afferente soltanto ai gruppi di pastori qui documentati, che si vedrà poi completata con uno studio più sistematico e complessivo sui pastori di Girsu che prepara la Dr.ssa. Maria Capitani (Istituto Orientale di Napoli).

I testi di *MVN 22* riguardano tre gruppi diversi di pastori:

- 1) Lu₂-kal-la, Ur-^dBa-ba₆, Ur-Ba-gar₂.
- 2) Lu₂-Ma₂-gan^{ki}, Lu₂-dingir-ra, An-ne₂, ^dNanna-si-sa₂.
- 3) Ni_g₂-kal-la, Lu₂-kal-la, An-ne₂, Lu₂-^dNin-šubur, A₂-na-mu.

Le tavolette dei Gruppi 1 e 2 includono nella loro datazione il nome di anno, il che non succede con le tavolette del Gruppo 3. Per questo motivo offriamo una tipologia e una sequenza cronologica solo dei testi appartenenti ai Gruppi 1 e 2. Le tavolette del Gruppo 3 (del quale ce ne sono due testi pubblicati in questo volume: NN. 128 e 164) sono per ora di una utilità relativa e, anche se può darsi che fossero state redatte nello stesso anno, dovranno essere studiate accuratamente per stabilire la loro datazione.

⁵ Altri gruppi, per esempio, sono quelli formati da tavolette redatte in un centro di distribuzione di oli e grassi destinati, in molti casi, al trattamento di tessuti; testi di messengeri; registri di uscite di tessuti, ecc.

I pastori del Gruppo 1 (Lu₂-kal-la, Ur-^dBa-ba₆, Ur-Ba-gar₂) lavoravano per l'e₂-udu ga₂-nun-giš¹⁰, quelli del Gruppo 2 (Lu₂-Ma₂-gan^{ki}, Lu₂-dingir-ra, An-ne₂, ^dNanna-si-sa₂) lo facevano per l'e₂-udu e₂-Ur-dun¹¹, e quelli del Gruppo 3 (Nig₂-kal-la, Lu₂-kal-la, An-ne₂, Lu₂-^dNin-šubur, A₂-na-mu) prestavano servizio nell'e₂-udu-gibil¹². Tuttavia la contabilità e la amministrazione sembra fossero comuni per tutti e tre gruppi, o almeno così si evince dal fatto che alcune tavolette registrano uscite che riguardano a più di un gruppo (note 10 e 11), e dallo scambio di personale fra queste organizzazioni¹³.

¹⁰ Abbreviato come ga₂-nun-giš: N. 70 (BM 13737), MVN 5 228, MVN 7 97, TBM 1 47, MVN 7 431, TUT 84. La appartenenza del Gruppo 1 al ga₂-nun-giš dipende, comunque, da accettare che gli integranti di questo gruppo siano identici ai pastori dello stesso nome che, insieme ad altri, si ritrovano nei testi citati in questa nota.

¹³ Per esempio, Ur-^dAma-uru-da svolgeva le sue funzioni di allevatore dei cuccioli sia insieme ai membri del Gruppo 3, sia con i pastori del Gruppo 1: N. 58 (BM 13721), UDT 71, MVN 17 134, CT 3 11 (BM 13882), DCS 65.

Questo testo, mal conservato e parzialmente scritto a secco, presenta varie peculiarità. La più importante riguarda il sistema di numerazione impiegato per il **ur**, che rende le sue unità con cunei verticali anzi che orizzontali (notato qui con I). Ci sono pochi casi simili documentati a Ur III: Genouillac, *Babyloniaca* 8 (1924) pl. VIII, Pupil 32; Sigrist, *Mél. Limet* (1996) pp. 111-116 (YBC 782, 823, 848, 849); *MVN* 5 291 (trattato da T. Gomi, *ZA* 83 [1993] pp. 38-39); e i testi qui pubblicati sotto i numeri 33 (BM 13673) e 54 (BM 13716). In questi ultimi due casi, si introduce anche una sequenza non abituale per la notazione delle misure di capacità: il segno per **ur** scrive all'inizio della sequenza, prima dei *nigida*, anzi che alla fine.

Nel testo si ritrova anche una espressione per la quale non posso dare una spiegazione: IN GUR DA(-ta). Potrebbe pensarsi a una interpretazione del tipo *in gur* <geš₂>-da, dove geš₂-da sarebbe la capienza del contenitore *bariga* usato per misurare i cereali (si veda Gomi, *ibid.*). Contro questa possibilità c'è l'assenza sistematica di geš₂ in tutti i passi, e il fatto che l'uso della preposizione semitica *in* in casi paralleli è solo documentato in testi del periodo sargonico (*MAD* 4 2:6, *OSP* 2 3:2). Si deve avvertire, per ultimo, che il testo è così slavato che il DA finale potrebbe (con difficoltà) essere A₂.

Gli ufficiali attestati in questa tavoletta compaiono anche nel N. 33 (BM 13673), N. 54 (BM 13716) e in *SNAT* 145.

Il testo sembra appartenere a un gruppo di documenti trattato da A. Uchitel (*ASJ* 14 [1992] pp. 317-338; *ASJ* 18 [1996] pp. 217-228) e B. Lafont (*RA* 88 [1994] pp. 107 ss.). Con una argomentazione convincente, B. Lafont ritiene che questi testi siano testimoni delle cerimonie svolte con motivo dei funerali di Šulgi e di Amar-Suen, essendo 𒌦_2 ^dŠul-gi una denominazione alternativa per il ki-a-nag ^dŠul-gi (*ibid.*, pp. 108-109). Tuttavia, in questa tavoletta si fa menzione dello 𒌦_2 Šu-^dSuen dumu lugal, che qui non può essere equivalente al ki-a-nag di Šu-Suen, data l'assenza del determinativo divino e la aggiunta della apposizione 𒌦_2 umu lugal. Sicuramente con questo termine si fa riferimento alla "casa" che Šu-Suen possedeva durante i primi anni del regno di Amar-Suen, e infatti la denominazione 𒌦_2 u-^dSuen dumu lugal 𒌦_2 documentata da AS1/i (*NATN* 825; H. Limet, *RA* 62 [1968] p. 8 N. 11) a AS5/iii (W.W. Hallo, *HUCA* 29 [1958] p. 73 N. 2). Si deve anche avvertire (come mi è stato segnalato verbalmente dallo stesso Lafont) che, in tutti gli altri casi di questo dossier, "e₂ + Nome di re" nel senso di ki-a-nag compare sempre all'inizio del testo, il che non è il caso che ci occupa.

R.1: udu ba-šim potrebbe essere in questi testi una abbreviazione per 𒌦_2 du Ba-šim-e^{ki}, attestato in *TEL* 255, *ITT* 3 5065 e *TLB* 3 34:v.8. Ba-šim-e (senza determinativo) si ritrova in *CST* 34:i.10 e *TBM* 1 107. Per il toponimo si veda P. Steinkeller, *ZA* 72 (1982) pp. 240-242.

R.9: Non c'è ancora un consenso sulla identificazione dello 𒌦_2 šeg₉-bar *sappāru*: esistono proposte tali come "pecora o capra selvatica", "bovino selvatico", "*Damma mesopotamica*" o "cinghiale". Da quanto io conosco, è stato P. Steinkeller (*BSAg* 8 [1995] p. 50) chi ha fatto il tentativo più serio di identificazione di questo animale, concludendo che "the šeg₉-bar should in all probability be identified as the Mesopotamian fallow deer (*Dama mesopotamica*)". Gli argomenti principali di Steinkeller sono due: 1) il fatto che šeg₉-bar compare in testi di Draham insieme a cervi (lulim), equidi e bovini, e non insieme a pecore o capre; 2) i cuccioli dello šeg₉-bar sono designati come amar. Per quanto riguarda il primo punto, questo gruppo di testi mostra invece che lo šeg₉-bar era allevato, in piccole quantità, insieme a pecore e bovini. Il secondo punto mostra, infatti, che lo šeg₉-bar non dovrebbe essere identificato con un tipo di pecora o capra (J.-M. Durand e D. Charpin, in *L'archéologie de l'Iraq* [Paris 1980], p. 131 n. 3, accennano alla esistenza in testi di Lagaš del termine šeg₉-bar preceduto dal determinativo udu, ma io non sono riuscito a trovare una referenza del genere).

A mio parere, la proposta di Steinkeller è sicuramente corretta, e ci sono alcuni altri dati che così lo suggeriscono. Un piccolo gruppo di testi da Umma registra la seguente espressione, di interpretazione incerta: *n ovini* mu maš-da₃-šeg₉-bar-(ra)-še₃ (*MVN* 16

1074, *BIN* 5 4, *SAKF* 94, *MVN* 11 Y, *Aleppo* 417, *SANTAG* 6 51). In questi casi, sembra che maš-da₃-šeg₉-bar deve essere inteso come il nome completo di un animale che, come la gazzella, apparterebbe alla famiglia dei bovidi e al gruppo degli ungulati. Un'altro testo (*MVN* 15 93) mostra una espressione simile, dove maš-da₃ è ripreso qualche riga sotto come šeg₉-bar: *n ovini* šu-a gi-na, 2 udu-nita₂ mu maš-da₃-še₃, udu šeg₉-bar-bi la₂-i₃-am₃. Poi, la quantità di cereali che si dava ai pastori (o allevatori) come cibo per lo šeg₉-bar, cioè fra 1 e 2 sila₃ (uguale a quella delle pecore), si addatta bene alla grandezza della *Dama mesopotamica*, che pesa fra 40 e 100 chili.

Gli animali registrati in questo dossier (si veda anche la *Introduzione* a questo volume) si destinavano sia alla produzione di carne e lana, sia alle offerte religiose. Probabilmente con questo ultimo scopo erano allevati gli šeg₉-bar, e magari anche le pecore-*bašim*. Comunque, uno studio sistematico e approfondito di tutti i testi riguardanti le consegne di cibo per gli animali a Girsu potrà fornire ulteriori precisioni sulla loro identificazione.

R.4: La parola nig₂-sur è stata interpretata da R.K. Englund (*Fischerei*, p. 143), per casi simili a questi,

come un tipo di contributo. In testi di messaggeri di Girsu, la espressione nig₂-sur-še₃ gin-na si ritrova in R.C. McNeil, *Messenger Texts* 528 (MLC 676); *Berens* 79; *MVN* 11 108; *HSS* 4 59. Una interpretazione diversa da quella che propone Englund dovrebbe essere cercata per nig₂-sur li dove appare in rapporto con cipolle: BM 13908 (N. 176); BM 14631 (H. Waetzoldt, *BSAg* 3 [1987] p. 42-43 N. 5); BM 20046 (*ibid.*, pp. 43-44 N. 6); *SANTAG* 6 321; *MVN* 12 426. Si veda anche M. Civil, *Fs. Birot*, p. 76

R.4: La lettura Šušum^{ki} per MUŠ₃.EREN^{ki} è stata suggerita da B. Lafont e F. Yıldız, *TCTI* 2, p. 359 s.v. Šušum^{ki}. Essi si sono basati sulla scrittura sillabica Šu-šu-um^{ki}, documentata in *TCTI* 1 950:iv.10: gir₃ Ip-qu₂-ša lu₂-kin-gi₄-a lugal kaskal Šu-šu-um^{ki}; lo stesso Ip-qu₂-ša si ritrova per esempio in *TCTI* 2 3524 facendo un viaggio a MUŠ₃.EREN^{ki}, per cui la proposta di Lafont e Yıldız si dimostrerebbe corretta. Ciononostante, non credo sia da scartare la lettura alternativa Šušin^{ki} (proposta da E. Sollberger, *JCS* 10 [1956] p. 24), dato che nel nostro testo, e anche in altri casi (T. Gomi, *Oriente* 16 [1980] p. 83 N. 121; D.R. Frayne, *RIME* 3/2.1.2.31), MUŠ₃.EREN^{ki} si appoggia sulla sillaba -na.
